

Mystery Quilt STEP TWO

In **Step One** you made 8 strip sets of 5 strips each.

Step Two - From each of those 8 strip sets, cut four 10" squares. You will have 32 strip squares. To assure your squares are square, it is recommended you line up one of the lines on your 10" ruler **along one of the seam lines in your strips**.

NOTE: You will be cutting off some of the widths from strips; just choose your favorite of the side strips and cut off more of the one you don't like as well.

You will have bits of strip sets left, **please attach** some of those to an index card or sheet of paper to share **next month**. We want to get an idea of the colors you are working with.

FYI: This quilt will go together quickly so if you are behind, try to get caught up in this Step.
